### Description:

Biweekly update mtg.

17 EPA FOIA (Freedom of Information Act) packages were delivered to residents that may have been affected by well water. A total of 61 wells were tested. EPA is currently providing alternative water to 4 homes; conducting full metal scans/random sampling at those homes. Three homes are scheduled for full scans to include RADs. Completion target date for all water sampling and validation is end of June 2012, pending on data analysis – this will result in a time-lag between when the last homes are sampled and results issued that may create a public relations issue.

Roy asked for summary of sampling results and the web link.

### Your Notes:
